Qtek

Keep the world in one

Qtek 9000

Product information

The world's first 3G Windows Mobile device! This new flagship is designed to work on the latest high speed UMTS networks!

Cutting edge 3G technology combined with a 520 MHz processor, full QWERTY keyboard and WiFi means that the 9000 is build for performance!

The display measures a full 480 x 640 pixel (VGA) and it is able to swivel and close back up on itself to allow for either two handed typing or PDA touch screen use.

The new Microsoft Windows Mobile 5.0 operating system is standard as are the Pocket versions of all your favourite MS applications such as Office, Outlook and MSN Messenger.

High speed connectivity coupled with dual cameras allow for Video Telephony while dual speakers, SD expandable memory and Windows Media Player make for a fantastic mobile multimedia experience!

Complete business workstation and multimedia centre combined in this, the latest heavy hitter from Qtek, the 9000!

The available AKU 2 ROM update offers both Messaging & Security Feature Pack for Windows Mobile 5.0™ and new applications. The new Messaging & Security Feature Pack enables business users to easily stay connected to their Microsoft Office Outlook Mobile information while on the go and helps businesses to better protect e-mails.
